IP 1000

Video over IP decoder

Network Inputs:

- **Video over IP camera captured on the IP 1000 for use by the ICS WC5000 video wall controller. This unit captures up to 16 SD IP videos or 8 HD IP videos . The IP 1000 is connected directly to the WC 5000 through a DVI input. The IP 1000 can be configured to connect and decode just about any IP camera available on the market. We have an extensive list of camera codex available and are adding new ones all the time. Also proprietary camera apps can be run on the IP 1000 and outputted to the WC 5000 video wall controller.**

Additional IP1000 units can be added to expand the number of IP cameras captured simultaneously and displayed on the WC 5000 video wall controller.

Each video over IP camera image can be resized and positioned anywhere on the video wall.

The IP 1000 is a standard Windows 7 PC and can be rack mountable
