ICS SignPRO-4.0 System is not just another digital signage product.

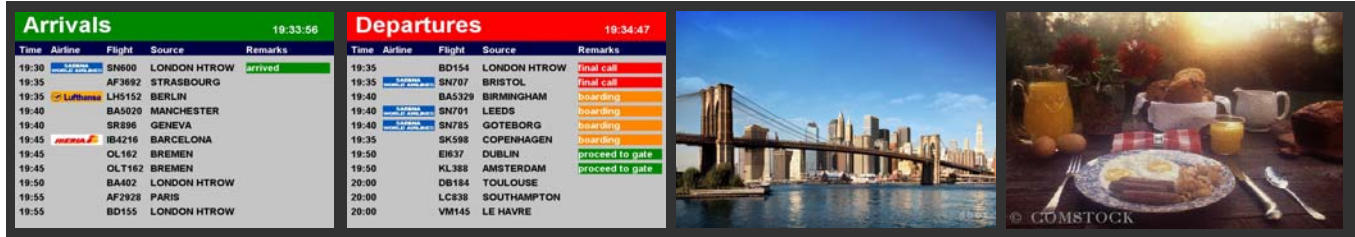

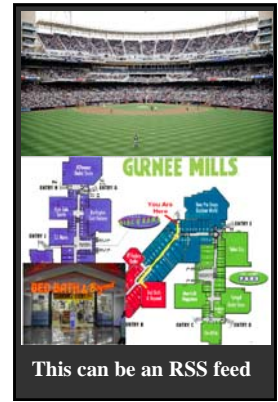

ICS SignPRO-4.0 System is based on the award winning PADS software product. PADS has more than 19 years of experience in the field, and during this period it has grown worldwide to be one of the most successful, comprehensive products in the market.

According to the valuable feedback we get from the market, our product is considered the most flexible and most technically advanced system for digital signage currently available worldwide.

Contact ICS Technology, Inc. for further information regarding a digital signage system that will meet your requirements.

ICS SignPRO-4.0 Digital Signage System

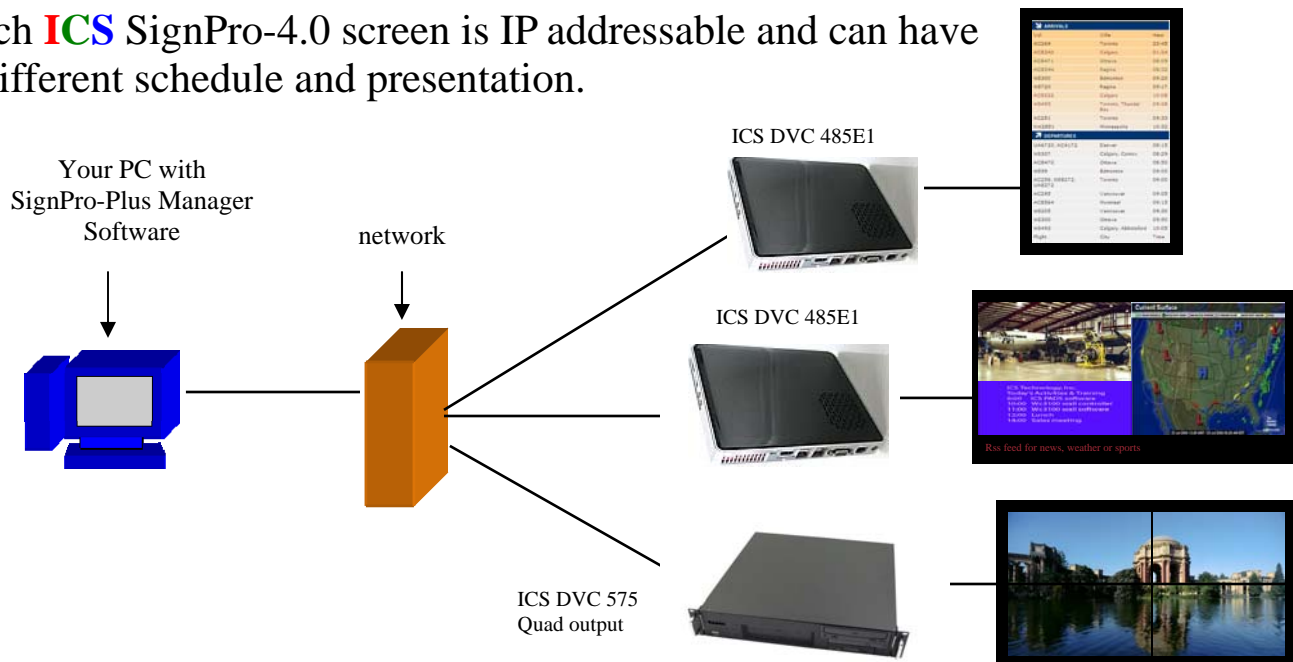

Presentation Design

Presentations can be designed using the following types of content:

- Videos (AVIs, MPEGs) Pictures (JPEGs, GIFs)
 - Text information Scrolling text
 - Web Browser (HTML, PowerPoint, FLASH, RSS feeds, etc.)
 - Live TV with channel select on each **SignPRO-4.0** player
 - Text information updated through a database connection
- We also offer up-to-date stock ticker, weather and news services.

Each **ICS SignPro-4.0** screen is IP addressable and can have a different schedule and presentation.

ICS Desktop Viewer Option

Our ICS PADS Desktop Viewer works as a digital signage system and Alert Message for your network connected PCs. It acts as a Digital signage screensaver for your internal announcements and as an emergency message distribution digital signage with it's Alert Message Feature.

The ICS PADS Desktop Viewer is the ideal way to get your message out to employees and coworkers. Just by using the ICS PADS Desktop Viewer you can schedule information / presentations to pop up in the Screensaver. This Screensaver acts just like a normal screensaver. You can set the idle time before the screensaver appears. We also have additional features that are very useful when you must get the message out quickly. We offer as part of our ICS Desktop Viewer a Quick Alert message function that will pop up on every PC screen connected to your network moments after you schedule it. You can schedule your message to be displayed on a day and time. . It works the same as our ICS Sign-Pro 4.0 PADS digital signage system for designing and scheduling presentations.

The ICS PADS Desktop Viewer is easily installed and communicates over your existing network to the ICS PADS Desktop Viewer software that can be located on any PC. The ICS PADS Desktop Viewer works in conjunction with the ICS SignPro digital signage system.

ICS DVC-485E1 PLAYER

SPECIFICATIONS
